1. Soru

A company requires a dashboard for reporting when using a business intelligence solution. Which AWS service can a Cloud Practitioner use? Which AWS service can be used?

- a) Amazon QuickSight
- b) Amazon Athena
- c) Amazon Redshift
- d) Amazon Kinesis

2. Soru

Which benefits can a company immediately realize using the AWS Cloud? (Select TWO.)

- a) No responsibility for security
- b) Variable expenses are replaced with capital expenses
- c) Increased agility
- d) Capital expenses are replaced with variable expenses
- e) User control of physical infrastructure

3. Soru

Which AWS service helps customers meet corporate, contractual, and regulatory compliance requirements for data security by using dedicated hardware appliances within the AWS Cloud?

- a) AWS Secrets Manager
- b) AWS CloudHSM
- c) AWS Key Management Service (AWS KMS)
- d) AWS Directory Service

4. Soru

How can an organization take advantage of tiered pricing across multiple business units within an organization?

- a) All Upfront Reserved Instances.
- b) AWS Organizations service control policies (SCPs).
- c) Cost Explorer utilization reports.
- d) AWS Organizations consolidated billing.

5. Soru

Which on-premises costs must be included in a Total Cost of Ownership (TCO) calculation when comparing against the AWS Cloud? (Select TWO.)

- a) Physical compute hardware
- b) Operating system administration
- c) Database schema development
- d) Project management services
- e) Network infrastructure in the data center

6. Soru

Which AWS service can be used to perform data extract, transform, and load (ETL) operations so you can prepare data for analytics?

- a) Amazon S3 Select
- b) Amazon QuickSight
- c) Amazon Athena
- d) AWS Glue

7. Soru

Which of the statements below is correct in relation to Consolidated Billing? (Select TWO.)

- a) You receive one bill per AWS account
- b) You pay a fee per linked account
- c) You are charged a fee per user
- d) You can combine usage and share volume pricing discounts
- e) You receive a single bill for multiple accounts

8. Soru

Which AWS service is a fully-managed source control service that hosts secure Git-based repositories?

- a) AWS CodePipeline
- b) AWS CodeDeploy
- c) AWS CodeBuild
- d) AWS CodeCommit

9. Soru

A new e-commerce company is looking for an AWS service to send transactional emails, such as order confirmations and password resets, to their customers.

Which AWS service would be most appropriate for this task?

- a) Amazon Elastic Compute Cloud (Amazon EC2)
- b) Amazon Simple Queue Service (Amazon SQS)
- c) Amazon Simple Notification Service (Amazon SNS)
- d) Amazon Simple Email Service (Amazon SES)

10. Soru

A Cloud practitioner wants to know if there are services which can protect from DDoS (Distributed Denial of Service) attacks directed at AWS services.

Which AWS service or tool will provide this protection?

- a) Network access control list (ACL)
- b) Security group
- c) AWS Shield
- d) Amazon GuardDuty

11. Soru

Which AWS service is used to send both text and email messages from distributed applications?

- a) Amazon Simple Email Service (Amazon SES)
- b) Amazon Simple Queue Service (Amazon SQS)
- c) Amazon Simple Notification Service (Amazon SNS)
- d) Amazon Simple Workflow Service (Amazon SWF)

12. Soru

According to the AWS shared responsibility model, which task is the customer's responsibility?

- a) Updating the guest operating system on Amazon EC2 instances.
- b) Updating the operating system of AWS Lambda instances.
- c) Maintaining the infrastructure needed to run Amazon DynamoDB.
- d) Maintaining Amazon API Gateway infrastructure.

13. Soru

Which benefit of AWS enables companies to replace upfront fixed expenses with variable expenses when using on-demand technology services?

- a) Global reach
- b) Economies of scale
- c) Pay-as-you-go pricing
- d) High availability

14. Soru

Which AWS hybrid storage service enables a user's on-premises applications to seamlessly use AWS Cloud storage?

- a) Amazon Connect
- b) AWS Backup
- c) AWS Direct Connect
- d) AWS Storage Gateway

15. Soru

Which AWS service can be used to run Docker containers?

- a) Amazon AMI
- b) Amazon ECR
- c) Amazon ECS
- d) AWS Lambda

16. Soru

Which AWS service does AWS Snowball Edge natively support?

- a) AWS Trusted Advisor
- b) AWS Database Migration Service (AWS DMS)
- c) Amazon EC2
- d) AWS Server Migration Service (AWS SMS)

17. Soru

Which service can a Cloud Practitioner use to configure custom cost and usage limits and enable alerts for when defined thresholds are exceeded?

- a) AWS Trusted Advisor
- b) Consolidated billing
- c) AWS Budgets
- d) Cost Explorer

18. Soru

What should a Cloud Practitioner ensure when designing a highly available architecture on AWS?

- a) There are enough servers to run at peak load available at all times.
- b) A single monolithic application component handles all operations.
- c) Servers have low-latency and high throughput network connectivity.
- d) The failure of a single component should not affect the application.

19. Soru

A company needs to use third-party software for its workload on AWS.

Is there a feature or service of AWS that the company can use to purchase the software?

- a) AWS License Manager
- b) AWS Managed Services
- c) AWS Marketplace
- d) AWS Resource Access Manager

20. Soru

According to the shared responsibility model, which security-related task is the responsibility of the customer?

- a) Maintaining physical networking configuration.
- b) Securing servers and racks at AWS data centers.
- c) Maintaining server-side encryption.
- d) Maintaining firewall configurations at a hardware level.

21. Soru

A corporation with multiple departments each having their own AWS accounts wants to implement a solution to customize billing data to match their specific showback or chargeback business logic. They wish to group accounts with similar financial owners and generate a distinct Cost and Usage Report (CUR) for each group.

- a) Which AWS service should they use to meet these requirements?
- b) AWS Billing and Cost Management
- c) AWS Billing Conductor
- d) AWS Cost Explorer
- e) AWS Budgets

22. Soru

A newly founded tech startup is looking for a program that offers AWS credits, training, technical support, and other resources to help them build their business.

Which AWS program would be the best fit for them?

- a) AWS Activate for Startups
- b) AWS Educate
- c) AWS Marketplace
- d) AWS Partner Network

23. Soru

Which AWS service should a Cloud Practitioner use to establish a secure network connection between an on-premises network and AWS?

- a) AWS Mobile Hub
- b) AWS Web Application Firewall (WAF)
- c) Amazon Virtual Private Cloud (VPC)
- d) Virtual Private Network

24. Soru

An eCommerce company plans to use the AWS Cloud to quickly deliver new functionality in an iterative manner, minimizing the time to market.

Which feature of the AWS Cloud provides this functionality?

- a) Agility
- b) Fault tolerance
- c) Elasticity
- d) Cost effectiveness

25. Soru

Which AWS dashboard displays relevant and timely information to help users manage events in progress, and provides proactive notifications to help plan for scheduled activities?

- a) AWS Service Health Dashboard
- b) Amazon CloudWatch dashboard
- c) AWS Personal Health Dashboard
- d) AWS Trusted Advisor dashboard

26. Soru

Which of the following are valid best practices for using the AWS Identity and Access Management (IAM) service? (Select TWO.)

- a) Embed access keys in application code.
- b) Use inline policies instead of customer managed policies.
- c) Create individual IAM users.
- d) Use groups to assign permissions to IAM users.
- e) Grant maximum privileges to IAM users.

27. Soru

How should an organization deploy an application running on multiple EC2 instances to ensure that a power failure does not cause an application outage?

- a) Launch the EC2 instances into Edge Locations
- b) Launch the EC2 instances in separate regions
- c) Launch the EC2 instances into different Availability Zones
- d) Launch the EC2 instances into different VPCs

28. Soru

Which of the following tasks can a user perform to optimize Amazon EC2 costs? (Select TWO.)

- a) Create users in a single Region to reduce the spread of EC2 instances globally.
- b) Create a policy to restrict IAM users from accessing the Amazon EC2 console.
- c) Implement Auto Scaling groups to add and remove instances based on demand.
- d) Set a budget to limit spending on Amazon EC2 instances using AWS Budgets.
- e) Purchase Amazon EC2 Reserved Instances.

29. Soru

A Cloud Practitioner noticed that IP addresses that are owned by AWS are being used to attempt to flood ports on some of the company's systems.

To whom should the issue be reported?

- a) AWS Partner Network (APN)
- b) AWS Trust & Safety team
- c) AWS Technical Account Manager (TAM)
- d) AWS Professional Services

30. Soru

A Cloud Practitioner requires a simple method to identify if unrestricted access to resources has been allowed by security groups. Which service can the Cloud Practitioner use?

- a) AWS Trusted Advisor
- b) Amazon CloudWatch
- c) VPC Flow Logs
- d) AWS CloudTrail

31. Soru

Which of the following is an advantage for a company running workloads in the AWS Cloud vs on-premises? (Select TWO.)

- a) Increased productivity for application development teams.
- b) Higher acquisition costs to support elastic workloads.
- c) Increased time to market for new application features.
- d) Less staff time is required to launch new workloads.
- e) Lower overall utilization of server and storage systems.

32. Soru

Amazon S3 is typically used for which of the following use cases? (Select TWO.)

- a) Host a static website
- b) In-memory data cache
- c) Media hosting
- d) Message queue
- e) Install an operating system

33. Soru

What can be used to allow an application running on an Amazon EC2 instance to securely store data in an Amazon S3 bucket without using long-term credentials?

- a) AWS IAM access key
- b) Amazon Connect
- c) AWS IAM role
- d) AWS Systems Manager

34. Soru

Which technology can automatically adjust compute capacity as demand for an application increases or decreases?

- a) Auto Scaling
- b) Load balancing
- c) High availability
- d) Fault tolerance

35. Soru

How can an organization gain access to compliance reports natively through the AWS console?

- a) AWS Security Hub
- b) AWS Identity and Access Management (IAM)
- c) AWS Certificate Manager (ACM)
- d) AWS Artifact

36. Soru

A company plan to move the application development to AWS. Which benefits can they achieve when developing and running applications in the AWS Cloud compared to on-premises? (Select TWO.)

- a) AWS takes care of application security patching.
- b) AWS can accommodate large changes in application demand.
- c) AWS automatically replicates all data globally.
- d) AWS will fully manage the entire application.
- e) AWS makes it easy to implement high availability.

37. Soru

A user needs an automated security assessment report that will identify unintended network access to Amazon EC2 instances and vulnerabilities on those instances.

Which AWS service will provide this assessment report?

- a) EC2 security groups
- b) AWS Config
- c) Amazon Inspector
- d) Amazon Macie

38. Soru

A company needs a consistent and dedicated connection between AWS resources and an on-premise system.

Which AWS service can fulfil this requirement?

- a) Amazon Connect
- b) AWS DataSync
- c) AWS Direct Connect
- d) AWS Managed VPN

39. Soru

According to the AWS Shared responsibility model, which two tasks are the responsibility of AWS? (Select TWO.)

- a) Perform identity and access management.
- b) Patch the operating system of Amazon S3.
- c) Provide physical security for Availability Zones.
- d) Manage customer data.
- e) Encrypt client-side data and authenticate data integrity.

40. Soru

A small business owner who is not tech-savvy is looking to find AWS certified experts for a short-term project. They need a service that can help them connect with professionals who can offer advice and help implement AWS solutions quickly.

Which AWS service should they use?

- a) AWS Marketplace
- b) AWS IQ
- c) AWS Training and Certification
- d) AWS Support

41. Soru

Which cloud architecture design principle is supported by deploying workloads across multiple Availability Zones?

- a) Design for agility.
- b) Design for failure.
- c) Automate infrastructure.
- d) Enable elasticity.

42. Soru

A company has a global user base and needs to deploy AWS services that can decrease network latency for their users. Which services may assist? (Select TWO.)

- a) Application Auto Scaling
- b) Amazon VPC
- c) AWS Direct Connect
- d) Amazon CloudFront
- e) AWS Global Accelerator

43. Soru

Which of the following should be used to improve the security of access to the AWS Management Console? (Select TWO.)

- a) AWS Secrets Manager
- b) Strong password policies
- c) AWS Multi-Factor Authentication (AWS MFA)
- d) AWS Certificate Manager
- e) Security group rules

44. Soru

Which of the following statements are security principles within the AWS Well-Architected Framework? (Select TWO.)

- a) Perform operations as code.
- b) Monitor, alert, and audit actions and changes to AWS resources.
- c) Deploy globally in minutes.
- d) Analyze and attribute expenditures.
- e) Protect data in transit and at rest.

45. Soru

What can a Cloud Practitioner use the AWS Total Cost of Ownership (TCO) Calculator for?

- a) Estimate savings when comparing the AWS Cloud to an on-premises environment
- b) Enable billing alerts to monitor actual AWS costs compared to estimated costs
- c) Generate reports that break down AWS Cloud compute costs by duration, resource, or tags
- d) Estimate a monthly bill for the AWS Cloud resources that will be used

46. Soru

A cloud practitioner needs to migrate a 70 TB of data from an on-premises data center into the AWS Cloud. The company has a slow and unreliable internet connection.

Which AWS service can the cloud practitioner leverage to transfer the data?

- a) AWS DataSync
- b) AWS Snowball
- c) AWS Storage Gateway
- d) Amazon S3 Glacier

47. Soru

According to the shared responsibility mode, which security and compliance task is AWS responsible for?

- a) Updating Amazon EC2 host firmware
- b) Updating operating systems
- c) Granting permissions to users and services
- d) Encrypting data at rest

48. Soru

Which AWS service or feature allows a company to receive a single monthly AWS bill when using multiple AWS accounts?

- a) AWS Cost and Usage report
- b) Amazon Cloud Directory
- c) Consolidated billing
- d) AWS Cost Explorer

49. Soru

A Cloud Practitioner wants to configure the AWS CLI for programmatic access to AWS services. Which credential components are required? (Select TWO.)

- a) An access key ID
- b) A secret access key
- c) A private key
- d) A public key
- e) An IAM Role

50. Soru

What is the function of Amazon EC2 Auto Scaling?

- a) Scales the size of EC2 instances up or down automatically, based on demand.
- b) Automatically modifies the network throughput of EC2 instances, based on demand.
- c) Scales the number of EC2 instances in or out automatically, based on demand.
- d) Automatically updates the EC2 pricing model, based on demand.

51. Soru

Which AWS service can be used to load data from Amazon S3, transform it, and move it to another destination?

- a) Amazon EMR
- b) AWS Glue
- c) Amazon Kinesis
- d) Amazon RedShift

52. Soru

Which Amazon EC2 tool acts as a virtual firewall to control inbound and outbound traffic to an EC2 instance?

- a) Security group
- b) AWS Shield
- c) Network access control list (ACL)
- d) AWS WAF

53. Soru

Which Amazon EC2 pricing model should be avoided if a workload cannot accept interruption if capacity becomes temporarily unavailable?

- a) Standard Reserved Instances
- b) Convertible Reserved Instances
- c) On-Demand Instances
- d) Spot Instances

54. Soru

Which AWS-managed service can be used to process vast amounts of data using a hosted Hadoop framework?

- a) Amazon Redshift
- b) Amazon EMR
- c) Amazon DynamoDB
- d) Amazon Athena

55. Soru

A company is interested in moving its on-premises NoSQL database into the AWS Cloud.

Which AWS service should the company use to replace their existing database?

- a) Amazon RDS for MySQL
- b) Amazon DynamoDB
- c) Amazon Redshift
- d) Amazon Quantum Ledger Database (Amazon QLDB)

56. Soru

Which of the following best describes an Availability Zone in the AWS Cloud?

- a) A completely isolated geographic location
- b) One or more physical data centers
- c) One or more edge locations based around the world
- d) A subnet for deploying resources into

57. Soru

A Service Control Policy (SCP) is used to manage the maximum available permissions and is associated with which of the following?

Service control policies (SCPs) manage permissions for which of the following?

- a) Availability Zones
- b) AWS Global Infrastructure
- c) AWS Regions
- d) AWS Organizations

58. Soru

Which AWS services offer compute capabilities? (Select TWO.)

- a) Amazon DynamoDB
- b) AWS Lambda
- c) Amazon CloudHSM
- d) Amazon EFS
- e) Amazon ECS

59. Soru

An application has highly dynamic usage patterns. Which characteristics of the AWS Cloud make it cost-effective for this type of workload? (Select TWO.)

- a) High availability
- b) Elasticity
- c) Strict security
- d) Pay-as-you-go pricing
- e) Reliability

60. Soru

Which of the following can be used to identify a specific user who terminated an Amazon RDS DB instance?

- a) Amazon CloudWatch
- b) AWS CloudTrail
- c) AWS Trusted Advisor
- d) Amazon Inspector

61. Soru

AWS are able to continue to reduce their pricing due to:

- a) Reserved instance pricing
- b) The AWS global infrastructure
- c) Pay-as-you go pricing
- d) Economies of scale

62. Soru

Which AWS service should a Cloud Practitioner use to automate configuration management using Puppet?

- a) AWS OpsWorks
- b) AWS CloudFormation
- c) AWS Config
- d) AWS Systems Manager

63. Soru

A user has limited knowledge of AWS services, but wants to quickly deploy a scalable Node.js application in an Amazon VPC.

Which service should be used to deploy the application?

- a) AWS Elastic Beanstalk
- b) AWS CloudFormation
- c) Amazon LightSail
- d) Amazon EC2

64. Soru

A Cloud Practitioner is re-architecting a monolithic application. Which design principles for cloud architecture do AWS recommend? (Select TWO.)

- a) Use self-managed servers.
- b) Design for scalability.
- c) Implement manual scalability.
- d) Implement loose coupling.
- e) Rely on individual components.

65. Soru

A company is migrating virtual machines (VMs) from their data center to the AWS Cloud. The company plans to deploy these migrated machines on Amazon EC2.

Which cloud computing model will the company use for this operation?

- a) Function as a Service (FaaS)
- b) Infrastructure as a Service (IaaS)
- c) Software as a Service (SaaS)
- d) Platform as a Service (PaaS)
